

Inspire, Engage, and Learn With Confidence

Protect, Detect, and Restore as Security Threats in K-12 Are on the Rise

Cyberattacks are an increasing concern for IT managers of K-12 school districts. There have been more than 430 cybersecurity incidents on K-12 districts nationwide since 2016.¹ The leading types of incidents include phishing attacks and unauthorized breaches or hacks that resulted in disclosure of personal data. Enabling your staff, students, and administration with mobile solutions that deliver performance and collaboration — as well as strong security — can lead to safer, more effective educational experiences.

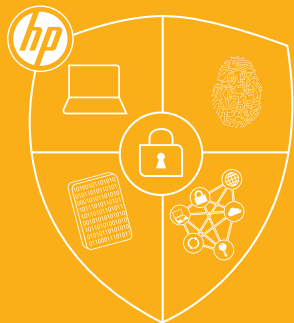

Gain Stress-Free IT Security

The key to effective security is layered defenses. It is no longer enough to simply protect your endpoints. You need protection from the inside out and throughout every step of the compute process. That's why Sehi Computer Products offers secure mobile solutions such as the HP EliteBook x360 1030 G2 Notebook PC, powered by the 7th Generation Intel® Core™ i7 processor. Perfect for educational environments, the HP EliteBook series delivers a multitiered security strategy to protect your students, staff, and administration:

Secure Devices. Reduce concerns about malware or security breaches with HP Sure Start, which secures PCs at the BIOS level, protecting devices while they're on and in use, which is when they are most vulnerable to attacks. If potential attacks are discovered, the device will restart in safe mode.

Secure Identity. Protect students, staff, and administration from identity theft using HP Client Security Manager multi-factor authentication, which delivers secure access through hardened credentials and policies enforced by Intel® Authenticate.

Secure Data. HP protects sensitive data with HP Sure View, a built-in privacy screen that eliminates visual hacking. HP Secure Erase safely and permanently removes data from hard disk drives prior to disposal. In addition, HP Sure Click protects data from being scraped from malicious browser-based programs.

K-12 school districts value technology that enables collaboration, performance, mobility, and strong security. Inspire your students, teachers, and administration with mobile computing solutions that deliver on these capabilities, such as the HP EliteBook x360 1030 G2 Notebook PC, powered by the 7th Generation Intel® Core™ i7 processor.

Dedicated to Meeting the IT Needs of K-12 Education

Sehi Computer Products is an information technology solutions company focused on serving customers in K-12 educational environments. For the past 35 years Sehi Computer Products, an HP Gold Partner, has supported schools by providing educators with innovative classroom solutions that engage students and advance academic achievement.

HP EliteBook x360 1030 G2 Notebook PC

Powerful Security

HP EliteBook notebook advanced security features include:

- Power-on authentication via password or fingerprint
- Dual biometric authentication with iris recognition
- Security lock slots
- Infrared cameras for face authentication
